## Directions: Making a Bar Graph

1. Fill in the data table.
2. Label the X axis (Look at the data table for an appropriate label)
3. Label the Y Axis (Look at the data table for an appropriate label)
4. Create a title using key words from the X axis and the Y axis.
5. Figure out how to space along the X axis. Skip at least one square between the Y axis and your first bar. You should have the same number of squares for each bar. The spacing of squares between each bar should also be the same.
6. Number the Y axis. Use as much of the graph as possible.
7. Create your bars using the data from the data table.
8. Neatly color each bar a different color. \*\*\*\* no squiggly or scribble coloring\*\*\*\*
